Version 1.0 · September 2026 · Screens shown are from the live demo with sample customers.

Contents

1. **How the system works:** the rental in eight steps
2. **Screen map:** every window at a glance
3. **Top bar:** status, demo and reset buttons
4. **Progress tracker:** where the current rental stands
5. **Business numbers:** the five tiles
6. **WhatsApp window:** what your customers see
7. **Assistant log:** what the assistant understood and did
8. **Fleet board:** which vehicle is where
9. **Rentals register:** every booking in one list
10. **Counter: handover:** giving out the keys
11. **Counter: return and settlement:** checking a vehicle back in
12. **Daily routine:** a checklist for the owner and staff
13. **Your prices and rules:** what the assistant quotes
14. **Common situations and questions**

1 How the system works

The Rental Desk replaces the back-and-forth of booking by phone. A customer messages your WhatsApp number, the assistant answers in about a second, checks which vehicles are free, gives an exact quote, collects the customer's details and the advance on UPI, and books the vehicle. Your staff only step in at the counter, when the customer comes to collect and when they return.

Step	Stage	Who does it	What happens
1	Enquiry	Assistant	Customer says when, how many days and where they are going.
2	Quote	Assistant	Checks the fleet, picks a free vehicle, sends rent, free km, deposit and advance.
3	KYC	Assistant	Collects full name, mobile number and driving licence number; checks the licence format.
4	Advance paid	Assistant	Sends a UPI request for 30% of the rent. On payment the rental is created and the vehicle is blocked.
5	Handover	Counter staff	Staff check documents and the vehicle, collect balance rent + deposit, hand over keys.
6	On ride	Assistant	Customer gets a "ride started" message; a return reminder is sent on the last day.
7	Return check	Counter staff	Staff enter odometer, fuel, lateness and any damage. The system works out charges.
8	Deposit settled	System	Refund goes out on UPI (or the customer pays the balance) and a receipt is sent on WhatsApp.

The short version: the assistant handles steps 1 to 4 and 6 on its own. Your staff do steps 5 and 7 from the **Counter** window. You watch everything from the **Rentals register** and the **Fleet board**.

2 Screen map

The whole desk is one screen. The numbers below match the sections of this guide.

The screenshot shows the 'Weekend Rides · Rental Desk' interface. It features a top bar with status and controls, a progress tracker for rental steps, business metrics, a WhatsApp chat window, an assistant log, a fleet board, a rentals register, and a counter for handover and return.

3 Top bar: Shows the assistant is online; demo and reset buttons.

4 Progress tracker: The eight steps, lit up for the rental you are looking at.

5 Business numbers: Messages, rentals, vehicles out, rent booked, deposits held.

6 WhatsApp window: The live conversation with the customer.

7 Assistant log: Every detail the assistant picked up and every action it took.

8 Fleet board: Each vehicle by registration number: free, booked, on ride or in service.

9 Rentals register: The list of all bookings; click one to open it at the counter.

10 Counter: Handover checklist, return inspection and final bill (sections 10 and 11).

Tile	What it counts
Messages handled	Customer messages the assistant has answered. Each one is a call you did not have to take.
Rentals booked	All real bookings in the register (flags for a person are not counted).
Bikes on the road	Vehicles currently with a customer (status On ride).
Rent booked	Total rent across all bookings in the register.
Deposits held	Deposit money you are holding right now for vehicles on the road. This must be refunded or settled when they return.

6 WhatsApp window

This is exactly what your customer sees on their phone. Green bubbles (right) are the customer; grey bubbles (left) are the assistant.

A quote for a weekend Sohra trip

What the assistant can do by itself

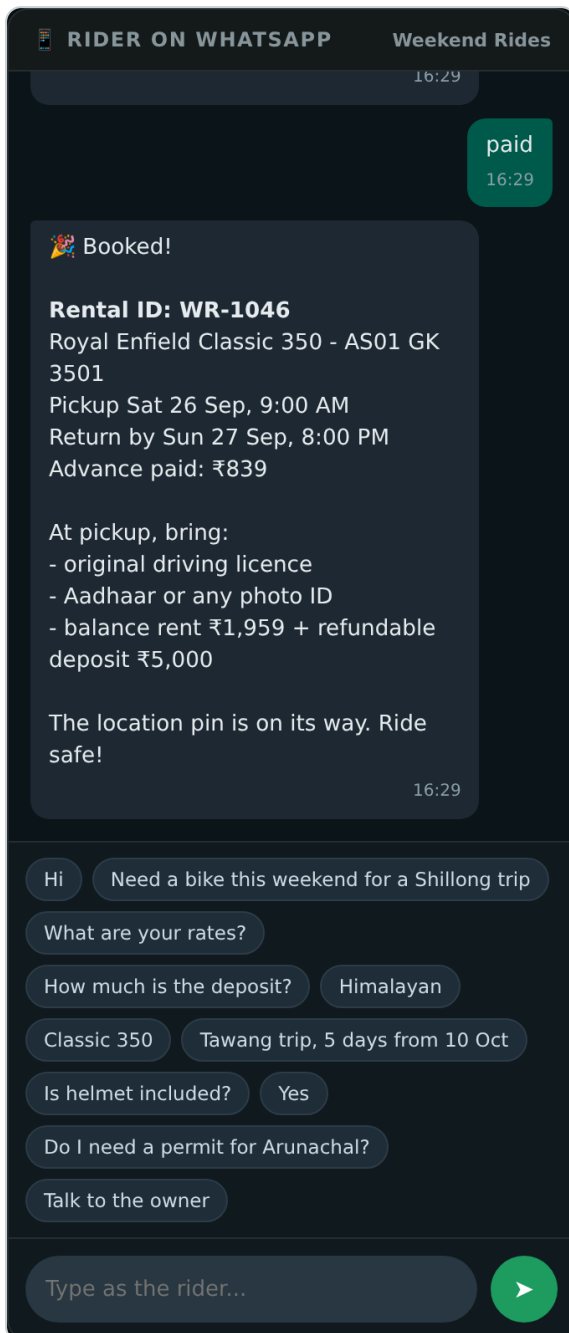

- Understand dates like "this weekend", "tomorrow", "Friday", "10 Oct", "3 days".
- Recognise vehicles by name ("Classic 350", "Himalayan", "Activa", "scooty").
- Recognise popular trips (Shillong, Sohra, Dawki, Kaziranga, Majuli, Tawang, Ziro) and warn if the trip is longer than the free km.
- Suggest another free vehicle if the one asked for is fully booked.
- Give the full quote: vehicle and number plate, pickup and return time, rent (weekday or weekend rate), free km, extra km rate, deposit and the 30% advance.
- Answer common questions: rates, deposit, documents, helmets, fuel, km limit, late return, Arunachal ILP permit, pillion, payment methods, shop location, minimum age.

The quick buttons

The rounded buttons under the chat ("Hi", "What are your rates?", "Talk to the owner"...) are sample customer messages for testing and training. The typing box at the bottom lets you type as a customer to see how the assistant would reply.

The customer only has to reply **YES** to accept a quote and **PAID** after paying. Everything else is plain conversation.

6 (continued) · Booking confirmed and handing over to you

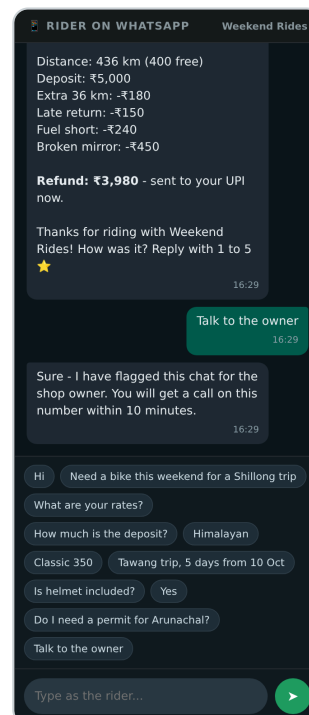

Confirmation after the advance is paid

After the customer accepts

1. The assistant asks for **full name, 10-digit mobile and driving licence number**, in one message if they like.
2. It checks the licence number format (state, RTO, year, 7 digits). In the live version the licence is also checked on Parivahan Sarathi.
3. It sends a **UPI payment request for the 30% advance**.
4. When the payment arrives, it creates the rental (ID like **WR-1046**), blocks the vehicle on those dates and sends the confirmation shown here, with what to bring and the location pin.

When the assistant needs you

If a customer asks for a person ("talk to the owner", "call me") or the assistant cannot understand two messages in a row, it tells the customer you will call within 10 minutes and puts a red **Needs human** row at the top of the register.

Always act on "Needs human" rows quickly. The customer has been promised a call within 10 minutes.

7 Assistant log: "What the assistant understood"

A running record of everything the assistant read and did. You don't need to act on it; it is there so you can check why something happened.

COLLECT AT PICKUP

Balance rent

₹1,959

Refundable deposit

₹5,000

Collect now

₹6,959

Hand over keys

Tick every check to continue.

What the staff member does

1. Confirm the customer name, vehicle and licence shown at the top.
2. Enter the **Odometer out** (km) and **Fuel out** (bars out of 5) from the vehicle.
3. Tick all six checks:
 - Original DL seen
 - Photo ID seen
 - 4-side photos of the vehicle taken
 - Helmet(s) issued (2 if there is a pillion)
 - Papers + PUC in the box
 - Tyres + brakes checked
4. Collect the amount shown under **Collect now**: balance rent + refundable deposit.
5. Press **Hand over keys**.

The button will not work until **every** box is ticked. This protects you in any damage dispute later.

What happens next

The rental turns **On ride**, the customer gets a "Ride started" WhatsApp with the odometer, fuel, free km and return time, and a return reminder is scheduled for 5 PM on their last day.

11 Counter: return and settlement

When the vehicle comes back, click the **On ride** row. The counter shows the return inspection. The bill updates as you type.

Damage: broken mirror- ₹450

Refund to rider₹3,980

Check in & refund deposit

Fill in four things

Odometer in	Reading now. The system subtracts the "went out at" reading and compares with the free km.
Fuel in	Bars on the gauge (0 to 5).
Returned	On time, 45 min late, 3 hours late, or next morning.
Damage	None, or pick the damage from the list.

How the bill is worked out

- **Extra km:** km over the free limit × the per-km rate for that model.
- **Late return:** 30 min grace, then ₹150 per hour. Next morning = one extra day's rent.
- **Fuel short:** ₹120 per missing bar.
- **Damage:** the listed repair price.

All charges come off the deposit. The green line shows the **refund**; if charges are more than the deposit, a red **Rider owes** line shows what to collect.

Press **Check in & refund deposit** to finish.

After check-in

- The rental becomes **Closed** and shows the final settlement.
- The refund is sent on UPI and the customer gets an itemised receipt on WhatsApp, with a request for a 1 to 5 star rating.
- If damage was entered, the vehicle goes to **In service** on the fleet board and **cannot be booked** until you click it back to Free (section 8).

Weekend Rides · Rental Desk Owner's Guide · page 11 of 14

12 Daily routine

Morning (before 9:00 AM pickups)

- Check the top bar says **ONLINE**.
- Look at the register for **Needs human** rows from overnight and call those customers first.
- On the fleet board, check today's **Booked** vehicles are washed, fuelled to 5/5 and have papers + PUC in the box.
- Click any **In service** vehicle that has been repaired to put it back on the fleet.

During the day

- For each pickup: open the rental, do the handover checklist, collect the money, **Hand over keys**.
- Keep an eye on the register for new bookings and red flags. Nothing else needs you; the assistant answers all enquiries.

Evening (returns by 8:00 PM)

- For each return: open the rental, inspect, enter odometer / fuel / lateness / damage, **Check in & refund deposit**.
- Look at "Deposits held". It should equal the deposits of the vehicles still on the road.

Weekly

- Read through a few chats in the log to see what customers are asking. Tell your support person about any question the assistant could not answer; it can be added.
- Update prices before long weekends and festivals (section 13).

13 Your prices and rules

These are the values the assistant quotes. To change any of them, send the new figures to your system support person; they are kept in one settings block, so changes take a few minutes.

Vehicle	Type	Weekday / day	Sat-Sun / day	Deposit	Free km / day	Extra km	Units
Honda Activa 6G	Scooter	₹499	₹599	₹2,000	120	₹3	3
Royal Enfield Classic 350	Cruiser	₹1,199	₹1,399	₹5,000	200	₹5	3
Bajaj Dominar 400	Tourer	₹1,499	₹1,699	₹5,000	250	₹6	2
Royal Enfield Himalayan 450	Adventure	₹1,799	₹1,999	₹8,000	250	₹6	2

Rule	Current setting
Shop hours	8 AM to 9 PM, all 7 days
Pickup time / return by	9:00 AM / 8:00 PM on the last day
Advance to block a vehicle	30% of the rent, on UPI
Late return	30 min grace, then ₹150 per hour; next morning = 1 extra day
Fuel	Return at the same level; ₹120 per missing bar (5-bar gauge)
Helmets	One free; pillion helmet ₹100 per day
Damage prices	Brake lever ₹350 · mirror ₹450 · tank scratch ₹900 · crash guard ₹2,500

14 Common situations and questions

Situation	What to do
A customer wants to extend their rental.	The assistant tells them to message; it extends if the vehicle is free. If another booking starts right after, you will get a "Needs human" flag. Call them.
A customer wants to cancel .	The assistant hands this to you. Refund the advance according to your policy and mark the rental accordingly.
The vehicle they wanted is fully booked .	Nothing. The assistant offers other free models that cover the trip distance.
Two people try to book the last vehicle at the same time.	Only the first payment gets it. The second customer's advance is refunded automatically and you get a "Needs human" flag to offer an alternative.
A customer is going to Tawang or Ziro .	The assistant reminds them they need an Arunachal Inner Line Permit (arunachalilp.com) and recommends the Himalayan for Tawang.
The licence number looks wrong.	The assistant asks the customer to re-check it and will not take payment until it is valid. Still check the original DL at handover.
A vehicle has a breakdown on the road.	The customer replies HELP on WhatsApp. This comes to you as a flag. Arrange help or a replacement.
Damage not in the list.	Choose the closest item, then adjust the refund manually and note it on the receipt. Ask your support person to add the item to the list.
A repaired vehicle is still not being offered.	It is still In service . Click it on the fleet board to make it Free.
Someone pressed Reset .	In the demo it goes back to sample data. On the live desk, bookings are in your Google Sheet / database, so nothing is lost. Contact support.
